# Changes UNIT4 DataCollector version 2.4.2

## General changes

- The handling of the text in error messages has been extended.

## AccountView

- The problem with the paths to network drives has been fixed.

## Afas

- If the account number of a booking appears in the VAT table, the VAT code will no longer be displayed in the booking.

## Auditfile

- AMF is added as a recognized Auditfile software supplier.

## FIS2000

- Multiple users attached to one booking no longer causes errors.
- The AccountsPayable and AccountsReceivable queries are totally revised.
- The JournalEntries query is divided into two parts:
  - For the OpeningBalance only the data booked on the main ledger accounts is exported.
  - For all the other periods only the data booked on sub ledger accounts is exported.
- The export of foreign currency amounts is corrected regarding the decimal separator.
  When there are no foreign currency amounts the local currency amounts are exported in the foreign currency amount fields.
- When determining the Debtor\Creditor the contra account is no longer used.
- Default values are corrected.

## JD Edwards

- Default values are corrected.

## Kirp

- If the bookdate lies in a previous year than the selected fiscal year but the booking does belong to the selected fiscal year the period will be set to 0 (zero).
  If the bookdate lies in a following year compared to the selected fiscal year but the booking does belong to the selected fiscal year the period will be set to 13.
- Default values are corrected.
  .

## SAP

- While exporting table T003 a loop could occur. This problem has been fixed.
- Ranges methodology has been added for extracting the tables BSEG en BKPF.
- Maximum Package size has been set to 512kB.
- The change of a Memory exception during writing the logfile has been minimized.
